

MUHAMMAD USMAN

Full-Stack AI Engineer

Lahore, Pakistan | mu.ai.dev@gmail.com | +92-325-6550687 | linkedin.com/in/muhammadusmangm | github.com/MuhammadUsmanGM | buildwithusman.me

SKILLS

AI/ML: RAG Pipelines, Agent Architectures, LangChain, Vector Databases, OpenAI, Gemini, Claude

Languages: Python, TypeScript, JavaScript, Rust, SQL

Frameworks & Tools: FastAPI, Next.js, React, Node.js, Qdrant, PostgreSQL, Docker, Git, GitHub Actions

EXPERIENCE

Freelance Full-Stack AI Engineer — Self-Employed

Feb 2026 – Present

- Build and ship AI solutions for international clients, including RAG chatbots, agent pipelines, and LLM-powered web applications using Python, FastAPI, Next.js, and LangChain.
- Own full project lifecycle from scoping and architecture through production deployment, covering document Q&A systems, automation bots, and vector-search APIs.

AI/ML Engineering Intern — DeveloperHub.co

Dec 2025 – Jan 2026

- Completed 10+ hands-on ML/AI notebooks across two learning-focused internship phases, covering classification, prediction models, and Gemini-powered chatbots using Python, Scikit-learn, and LangChain.

PROJECTS

Autonoma | github.com/MuhammadUsmanGM/autonoma

- Built a personal AI agent platform with a live telemetry dashboard and a unified gateway across Telegram, WhatsApp, Discord, and Gmail, reducing manual workload by 85%.
- Engineered a BM25-ranked SQLite FTS5 memory engine with importance-based decay and deduplication, achieving sub-5ms multi-session retrieval.

CodeLens | github.com/MuhammadUsmanGM/CodeLens

- Built a RAG pipeline over large codebases using AST-aware chunking and Qdrant vector search, achieving sub-10ms retrieval across 40+ languages.
- Shipped as an npx CLI with 300+ downloads; grounds LLM responses in source-code truth to eliminate hallucinations during architectural discovery.

CodeStick | github.com/MuhammadUsmanGM/code-stick

- Built a cross-platform CLI that turns any USB drive into an offline, zero-install AI coding workstation running on Windows, macOS, and Linux.
- Shipped to npm with 1,500+ downloads; engineered a resilient, SHA-256-verified model delivery system for reliable setup on removable media.

EDUCATION

Bachelor of Science, Software Engineering — Virtual University of Pakistan

Oct 2024 – Expected 2028

Certified Agentic AI Engineer — PIAIC

Presidential Initiative for Artificial Intelligence & Computing | Dec 2024 – Expected 2026
