

MUHAMMAD USMAN

Full-Stack AI Engineer | AI Systems & Autonomous Agents

mu.ai.dev@gmail.com | +92-325-6550687 | Lahore, PK

LinkedIn: muhammad-usman-ai-dev | GitHub: MuhammadUsmanGM | buildwithusman.me

SUMMARY

Full-Stack AI Engineer specializing in LLM-powered applications, autonomous agent systems, and high-performance backend tooling. Built and shipped production systems spanning a PyPI-published Rust database engine, multi-agent orchestration platforms, and end-to-end AI automation pipelines — from low-level systems programming to serverless React frontends.

KEY SKILLS

Languages & Frameworks: Python, TypeScript, JavaScript, Rust, SQL, FastAPI, Next.js, React, Node.js

AI/ML: RAG Pipelines, Agent Architectures, LangChain, Vector Databases, OpenAI, Gemini, Claude

Databases & Tools: n8n, PostgreSQL, MongoDB, SQLite, Supabase, Docker, Git, GitHub Actions, Vercel

WORK EXPERIENCE

AI/ML Engineering Intern | DeveloperHub.co

Dec 2025 – Jan 2026

- Built 5 end-to-end ML/AI Streamlit applications in 6 weeks including RAG chatbots and predictive models using Python, LangChain, TensorFlow, and Scikit-learn.
- Developed a Gemini-powered mental health assistant with real-time crisis-detection logic.

PROJECTS

ELYX — Autonomous AI Agent | Python, FastAPI, Next.js, SQLite, LLM APIs

github.com/MuhammadUsmanGM/ELYX-Digital-FTE

- Eliminated manual communication overhead by building an event-driven AI agent monitoring Gmail, WhatsApp, and Odoo ERP to trigger role-scoped approval workflows.
- Engineered model-agnostic LLM routing across 4 providers, reducing operator response time with cryptographically signed audit trails and human-in-the-loop gates.

FerrumDB | Rust, PyO3, Tokio, AES-256-GCM, Axum

github.com/MuhammadUsmanGM/FerrumDB

- Built a custom embedded database engine in Rust (~1,000 lines) with O(1) reads/writes, AES-256-GCM encryption, atomic transactions, and a Bitcask-inspired log architecture.
- Shipped to both PyPI and crates.io with 330+ real-world downloads; benchmarked sub-1µs GETs and 1,000 SETs in ~2-5ms via Criterion.

The Signal — AI Newsletter | React, Node.js, Supabase, GitHub Actions, Cloudflare

github.com/MuhammadUsmanGM/THE-SIGNAL | news-letter-umber-five.vercel.app

- Engineered a fully autonomous AI newsletter pipeline ingesting global AI news via LLM summarization and delivering weekly briefings to 300+ subscribers.
- Secured delivery with Cloudflare Turnstile and implemented serverless scheduling via GitHub Actions for timezone-aware 9AM local-time email distribution.

EDUCATION

Bachelor of Science in Software Engineering

Virtual University of Pakistan

Oct 2024 – Expected 2028

Certified Agentic AI Engineer

Presidential Initiative for Artificial Intelligence & Computing (PIAIC)

Dec 2024 – present
